

TESTIMONIAL

As my mother's years of life reached her upper 80's, she started to suffer from an increasing number of medical issues. At the same time that these medical issues required greater medical support, she was becoming less able to handle these conditions by herself. I began searching for a facility that I could entrust with my mother's care. I found that place at Tender Hearts Assisted Care!

The fact that Tender Hearts has two full-time registered nurses on staff was the first thing that caught my attention. As I had hoped, they were able to completely provide for my mother's skilled nursing care. I did not have to worry about arranging for outside nursing to come in to take care of some of her issues as other facilities were advising. The RN's continually strove to improve my mother's quality of life. They really impressed me with their continuous monitoring of my mother's medical conditions and their ability to catch problems early as well as their recommendations for my mother's care. They were outstanding!

I was similarly impressed with the whole staff! To a person, the CNA's and other workers treated my mother as a member of the family. Visiting almost daily, I can attest that they treated her and the other residents with kindness, respect, and love.

Finally, I have to commend the physical layout of the Tender Hearts Assisted Care. None of the residents' rooms are a far distance from the cafeteria or activity rooms. This was important since she was already in a wheelchair when she moved in.

I simply cannot imagine a better place for my mother to have lived in for the last months of her life!
